EXPERIENCE

Innominds SEZ Private Limited — UI Developer

Hyderabad, Sep 2021 - PRESENT

- Developed responsive web applications using JavaScript frameworks Angular and React, enabling users to seamlessly interact with the application on any device.
- Integrated Backend APIs into the frontend UI, utilizing my knowledge of API architectures and programming languages to create a cohesive and efficient system.
- Utilized wireframes to develop frontend screens that aligned with project requirements and user needs, resulting in an intuitive and visually appealing user interface.
- Deployed code to the server and maintained code updates using GIT, ensuring smooth functioning of the application and enabling quick resolution of any issues that arose.

iB Hubs — Software Development Intern

Kurnool, July 2019 - July 2021

- Developed static websites using HTML, CSS, JavaScript, and Bootstrap to enhance the user experience and create visually appealing websites.
- Engineered an IoT project for an Automatic Accident avoidance system, utilizing my knowledge of programming languages and hardware components to develop a reliable and efficient system.
- Collaborated with management to support upcoming projects, contributing valuable ideas and insights to help drive project success.
- Executed administrative tasks under managerial supervision, demonstrating my ability to work independently while adhering to guidelines and protocols set by superiors.
